

Vortex V34-2 Dust Extractor

H CLASS DUST EXTRACTOR, VARIABLE SUCTION POWER, WORK SAFE

FEATURES

- Compact portable design
- 2 stage filtration system
- Tested and certified HEPA filters
- Efficient Jet Pulse cleaning system
- Continuous drop down bag system
- Individual motor on/off switch
- 75mm hose inlet
- Maximum dust separation
- Metal hose connection
- Robust construction
- 12 month warranty

TECHNICAL SPECS

PRODUCT CODE	501201
MOTOR	2 X 1,700 W
AIR FLOW	528 M ³ /H
PRE FILTER	2,500 CM ² , H8
HEPA FILTER	2 X 1,250 CM ² , H13
VACUUM	22 KPA
WEIGHT	56 KG
DIMENSIONS	65 X 50 X 120 CM

Vortex V34-2 Dust Extractor

WHY BUY A VORTEX SERIES 2 DUST EXTRACTOR

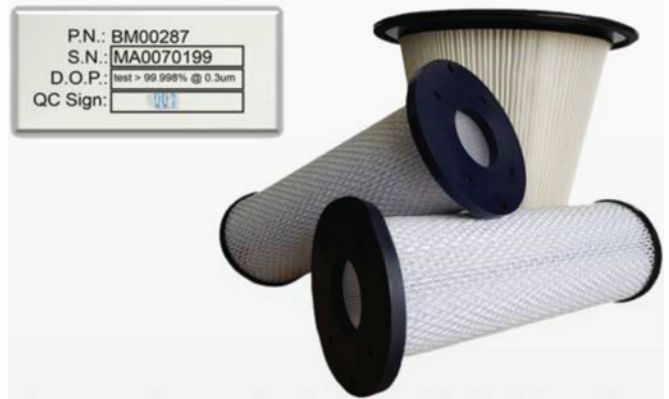

DUST IS NOT DUST

Deadly dust spreads around construction job sites. Especially true in jobs that involve the use of concrete grinders, electric saws, drills and jack hammers.

The floor grinding and polishing contractor is at high risk of exposure to silica dust. The smallest particles you can't see are the most dangerous. They penetrate into your lungs and stay there, causing horrible disease to the operator.

The best way to reduce silica dust exposure in concrete grinding is to use tested and certified HEPA Filters.

TESTED & CERTIFIED CLASS H HEPA FILTERS

UNIQUE CLEANING WITHOUT OPENING VACUUM

DROP DOWN CONTINUOUS BAGS

FEATURES

- Drop down continuous bag style
- Maximise grinder performance
- Less dust contamination
- Fast high volume recovery of dust
- Easy and efficient filter cleaning
- Work with all grinders, scarifiers etc.
